Sprint number: 4

Features Implemented: Dark mode, graph class, weight entry widget, added globals page,and add motivational notifications.

Issues fixed:

What went well or what went wrong: Documentation went well, everyone found something to do. Progress coding the actual app has still been slow.

Changes made: Documents updated.

What will be done for the next sprint:

What went well in scrum and what could be improved: Most members participated and added code. Need to work on daily scrum meetings by talking about progress of project more and what needs to be done more.
